

MBX CONTENT DELIVERY NETWORK SOLUTIONS

DELIVERING FULLY-INTEGRATED HARDWARE SOLUTIONS TO KEEP DIGITAL CONTENT FLOWING

Moving content reliably and quickly requires the right hardware foundation. You need the quality to keep networks operating at peak performance in the field along with performance to provide a consistent content experience for customers. You also want your systems integrated with the most advanced components to meet your performance and cost targets while satisfying your bandwidth, storage, latency, and redundancy needs, among others.

From expertise with flash storage and high capacity spinning disks to networking and more, MBX has the capabilities to transform the right components into a CDN solution that paves the way for smooth deployments. No matter how tough the performance and environmental requirements, MBX-engineered solutions deliver the best hardware experience, right out of the box.

Plus, with our industry-first toolset, MBX Hatch™, you gain real-time visibility throughout the hardware supply chain including work in progress through each manufacturing work center. The cloud-based solution enables customers to view their product lifecycles, see which components are nearing end of life, and get detailed information such as component country of origin and environmental controls. It simplifies hardware management and provides transparency every step of the way.

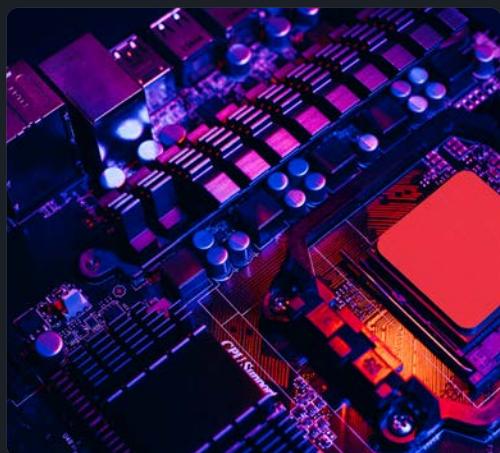

CDN EXPERTISE

QUALITY AND FUNCTIONALITY TO MEET YOUR CDN USE CASE

- **Showcase your network solution** with fully integrated high-performing hardware that is purpose-built for your deployments
- **Comprehensive CDN systems** are engineered with the right components to support goals for bandwidth, storage, latency, redundancy, and more
- **Rack and stack integration expertise** includes network switches, PDUs and any other requirements, plus custom crates for secure transport
- **Simplified hardware management** with Hatch for cloud-based control and visibility

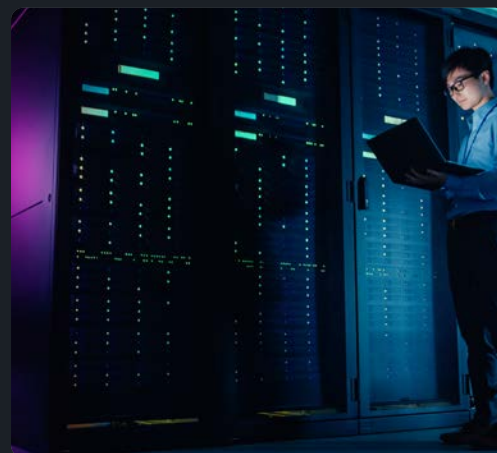

MBX DELIVERS ROBUST HARDWARE SOLUTIONS TO TACKLE EVEN THE MOST CHALLENGING CDN USE CASES

CONSISTENTLY PERFORMING HARDWARE SOLUTIONS THAT MEET YOUR SPECIFICATIONS.

- Gain robust performance with the right bandwidth and storage for your needs
- Tailor hardware configurations for specific end-user requirements
- Achieve a seamless supply chain for faster order turnaround

DEEP EXPERTISE AND EXPERIENCE TO MEET INDUSTRY-SPECIFIC CRITERIA.

- Build solutions for large infrastructure projects for faster time to market
- Install and verify firmware, operating system, software, other operational needs
- Functional testing to validate systems are configured and performing as intended
- Optional fill-site service to outsource your content loading

UNPRECEDENTED VISIBILITY INTO THE PRODUCT LIFECYCLE WITH HATCH.

- Gain a comprehensive point of control for hardware systems
- Customize your configurations within a single bill of materials
- Access data harvested in manufacturing - MAC addresses, serial numbers, firmware revisions, and more
- Facilitate accurate inventory planning and on-site delivery dates for predictable order fulfillment
