# MBX MEDICAL DISPLAYS

COMMERCIAL MONITORS, EMBEDDED DISPLAYS,  
PANEL PCS AND ALL-IN-ONES

## OUR DISPLAYS EXPERTISE

### A FOCUS ON LONGEVITY AND DURABILITY FOR LONG-LASTING VALUE

- **Comprehensive knowledge** of all-in-one, customized, hybrid, and off-the-shelf display solutions
- **Expertise** in designing and delivering displays built for longevity and reduced total cost of ownership
- **Purpose-built displays** that meet requirements for compliance, durability, footprint, and branding
- **Simplified hardware management** with Hatch for cloud-based control and visibility

Display systems are critical to the medical industry. They're part of everyday work tasks and an integral component of health care, whether they're integrated into nursing stations, lab systems, or diagnostic solutions. Display systems must stand up to rigorous use, potentially hazardous environmental conditions, and demands for business value amid often-constrained budgets. We recognize that when one component fails, the whole system may shut down, resulting in patient-care delays.

MBX has decades of expertise and experience delivering long-lasting, high-quality display systems. Our all-in-one and hybrid solution designs take into account durability, footprint, performance, serviceability, and customization needs. We integrate and test the display units to ensure they meet all of your requirements. And if the best fit for the task is an off-the-shelf solution from a Tier 1 manufacturer like Dell, our close OEM partnerships allow us to procure these, too.

MBX-engineered medical displays are ensured to have all the necessary connection ports, proportions, and installed software for out-of-the-box functionality. We can also seamlessly customize displays to achieve consistency with your organization's identification and branding needs.

# MBX DELIVERS ROBUST, DURABLE DISPLAY SOLUTIONS FOR THE MEDICAL INDUSTRY

## CONSISTENT, PURPOSE-BUILT DISPLAY SOLUTIONS DESIGNED FOR VALUE, BUILT TO LAST.

- Gain reliable performance with quality components designed and manufactured for longevity
- Deploy solutions that withstand challenging environmental conditions and constant use
- Reduce serviceability concerns with hybrid-designed displays that are easily maintained

## DEEP EXPERTISE AND EXPERIENCE TO MEET MEDICAL INDUSTRY CRITERIA.

- Achieve compliance with systems built in our ISO 13485:2016 factory that meet medical-device quality standards
- Satisfy durability, portability, weight, and dimensional requirements for medical use cases and settings
- Work alongside the MBX dedicated engineering team to address specialized configurations, such as unique port requirements, component needs, and branding requests

## UNPRECEDENTED VISIBILITY INTO THE DISPLAY LIFECYCLE WITH MBX HATCH.

- Hatch is a proprietary toolset for MBX customers designed to help simplify all the facets of managing their hardware supply chain
- Gain a single point of control for display system deployments
- View individual components for detailed data on product lifecycle, country of origin and equipment environmental controls, and more
- Facilitate accurate on-site scheduling and inventory planning for timely order fulfillment

Obtain a side-by-side evaluation of medical display systems to meet your performance and budget requirements. Contact us at [sales@mbx.com](mailto:sales@mbx.com) or through our website:
